Batch number (bottom of the bottle): _____

Please describe original problem in detail and results after Gaskit application

Once complete, please send via email to: sales@cleandrive.com

Gask-it will repair most leaks in the head, head gasket and block and has a very high success rate. If Gask-it is used as directed and does not successfully repair the coolant leak, or a repair made with Gask-it fails within 28 days, we will provide a refund of the original purchase value up to the maximum RRP (£39.99) or a replacement bottle. In the event of a claim just contact us via our website www.eco-motive.com or email sales@eco-motive.com with your full contact details, proof of purchase from an authorized Gask-it reseller, vehicle details and a description of the original problem.

*We will also need evidence that the original coolant leak problem was not sealed. Previously accepted examples have included:

- A statement from a VAT registered garage, that via compression or gas test your vehicle has definitely blown a head gasket
- Confirmation that the vehicle has been scrapped
- Invoice that shows a mechanical head gasket repair has subsequently been carried out
